DETAILED ACTION

1. The Art Unit location of your application in the USPTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Art Unit 1732, Examiner Leo Tentoni.

Priority

2. Applicant has not complied with one or more conditions for receiving the benefit of an earlier filing date under 35 U.S.C. 120 as follows:

An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Specification

3. The abstract of the disclosure is objected to because in line 1, ``comprising'' should be - - including - - and in line 3, ``comprises'' should be - - includes - - (legal or claim-type phraseology should not be used in the abstract). Correction is required. See MPEP § 608.01(b)..

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the

Art Unit: 1732

range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

5. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: PROCESS OF MAKING A DENTAL PROSTHESIS.

Allowable Subject Matter

6. Claims 37-40 are allowable over the prior art references presently of record.

7. The following is a statement of reasons for the indication of allowable subject matter: None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of making a dental prosthesis including molding such that a base is integrally connected to a clasp, the base including pigment and being substantially opaque and the clasp being effectively free of pigment and being substantially transparent as set forth in independent claims 37 and 40. None of the prior art references presently of record, alone or in combination, disclose, suggest or teach a process of making a

Art Unit: 1732

dental prosthesis including the steps of injecting substantially transparent thermoplastic into a first portion of a mold cavity and injecting substantially opaque thermoplastic into a second portion of a mold cavity, such that the dental prosthesis includes an opaque base including pigment which is integrally connected to a substantially transparent clasp as set forth in independent claim 39.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent 4,956,130 (Sonner) teaches a process of making a dental prosthesis including formation of a base having different colors.

9. This application is in condition for allowance except for the following formal matters:

Correction of the specification (i.e., the abstract and the continuing data) and a new title.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
